Should Fix:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

- https://www.google-analytics.com/plugins/ua/linkid.js (60 minutes)
- https://www.google-analytics.com/analytics.js (2 hours)
- https://cams.is/wp-content/cache/busting/1/wp-includes-js-jquery-jquery-1.12.4.js (4 hours)
- https://cams.is/wp-content/cache/min/1/27d2114ec9ece5bc16aa97b13c60298b.css (4 hours)
- https://cams.is/wp-content/cache/min/1/b63bb7e000a2db9b15dfb1cc8f74bad2.js (4 hours)
- https://cams.is/wp-content/cache/min/1/cb87baa88b88df1a32290dc9f836bd86.js (4 hours)

- https://cams.is/wp-content/plugins/easy-social-share-buttons3/assets/js/essb-core.min.js (4 hours)
- https://cams.is/wp-content/plugins/wp-rocket/inc/front/js/lazyload.1.0.5.min.js (4 hours)
- https://cams.is/wp-content/plugins/zombify/assets/images/zombify-logo.png (4 hours)
- https://cams.is/wp-content/themes/boombox/buddypress/images/user.jpg (4 hours)
- https://cams.is/wp-content/themes/boombox/fonts/iconfonts/icomoon/fonts/icomoon.ttf?ywxarp (4 hours)
- https://cams.is/wp-content/uploads/2017/03/10-2.jpg (4 hours)
- https://cams.is/wp-content/uploads/2017/03/8-2.jpg (4 hours)
- https://cams.is/wp-content/uploads/2017/03/gus.jpg (4 hours)

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 6 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

https://cams.is/wp-content/cache/busting/1/wp-includes-js-iguery-jguery-1.12.4.js

Optimize CSS Delivery of the following:

- https://fonts.googleapis.com/css?family=Open+Sans%3A400%2C500%2C400italic%2C500italic%2C600%2C600italic%2C700%2C700italic%7CLato%3A400%2C500%2C400italic%2C600%2C700%7COpen+Sans%3A400%2C500%2C400italic%2C600%2C700%7COpen+Sans%3A700
- https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.4.0/css/font-awesome.min.css?ver=1.3.8.1
- https://cams.is/wp-content/cache/min/1/27d2114ec9ece5bc16aa97b13c60298b.css
- https://fonts.googleapis.com/css?family=Open+Sans%3A400%2C500%2C400italic%2C500italic%2C600%2C600italic%2C700%2C700italic%7CLato%3A400%2C500%2C400italic%2C600%2C700%7COpen+Sans%3A400%2C500%2C400italic%2C600%2C700%7COpen+Sans%3

Mobile

A700

- https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.4.0/css/font-awesome.min.css?ver=1.3.8.1
- https://cams.is/wp-content/cache/min/1/27d2114ec9ece5bc16aa97b13c60298b.css

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 243.4KiB (55% reduction).

- Compressing https://cams.is/wp-content/uploads/2017/03/8-2.jpg could save 132.7KiB (67% reduction).
- Compressing https://cams.is/wp-content/uploads/2017/03/gus.jpg could save 56.4KiB (60% reduction).
- Compressing https://cams.is/wp-content/uploads/2017/03/10-2.jpg could save 50.2KiB (35% reduction).
- Compressing and resizing https://cams.is/wp-content/themes/boombox/buddypress/images/user.jpg could save 4.2KiB (91% reduction).

Consider Fixing:

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. Prioritize visible content that is needed for rendering above-the-fold by including it directly in the HTML response.

Only about 55% of the final above-the-fold content could be rendered with the full HTML

response snapshot:2.

94 / 100 User Experience

Consider Fixing:

Size content to viewport

Mobile

The page content is too wide for the viewport, forcing the user to scroll horizontally. Size the page content to the viewport to provide a better user experience.

The page content is 417 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element <div class="col-md-4"></div> falls outside the viewport.
- The element <div class="col-md-4"> falls outside the viewport.
- The element <div class="col-md-4"> falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target Hot and 9 others are close to other tap targets final.
- The tap target Uncategorized and 13 others are close to other tap targets final.
- The tap target GAMES and 1 others are close to other tap targets.
